

CASCA COVID-19 RAPID TESTING PROTOCOL

BEFORE BEGINNING RAPID TESTING:

- Obtain your supply of Quidel QuickVue® self-administration test kits during registration
- Review QuickVue® test instructions, kit inserts and demonstration video:
https://quickvueathome.ca/#video_testkit-2. [FAQs](#)

ONCE YOU BEGIN RAPID TESTING:

Recommended Frequency: Daily

Follow the appropriate protocol below based on your result

IF TEST RESULTS ARE:

NEGATIVE

1. Proceed to conference
2. Follow on-site health and safety measures and continue to follow testing protocol

POSITIVE

Report results to **Report** Positive results to [Alex Hill](#) and [Roland Kothes](#) on the same day the test is performed

1. **Do not return to the conference for 5 days. Only return if you have no symptoms except for a residual cough. Continue to attend the conference virtually.**
 - Provide 1 negative test result before physical re-entry into the conference

INCONCLUSIVE

1. Review instructions on test kit
2. Repeat the rapid test using a new at-home test and, if result is negative, follow instructions above for a negative result
3. If there is a second inconclusive/invalid result, treat the rapid test result as a positive and follow steps above for a positive result
